

MULTI-FAMILY

GREYSTONE
BUILDERS

October 5, 2006

To: Who it may concern.

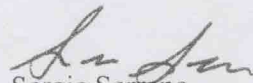

I have worked with Chuck Minch and C-ME Trim on multiple projects in the past six years. During this time we have worked together on both garden style and podium type buildings.

C-Me Trim has always preformed above and beyond their competitors in production and quality of work. They are also very proactive in any project they take on. It is not uncommon for them to make suggestions during the bidding process as to how to better the product, or to head off any potential problems that may not be visible on either project drawings or specifications. During construction they will make multiple visits to the project before they start work to in order to verify openings, locations and orientation of their materials.

During installation, they work with other trades to complete their work in even the tightest schedules. Follow-up on pickup items is also done in a very timely manner, even if it means totally replacing items damaged due to other trades, being fair as to replacement cost.

I think that if you were to use C-Me Trim for your project, you would be totally satisfied.

Respectfully,

Sergie Serrano
